Profilers Samplers Flotation

Wave hello
to Prowler

Wave-actuated profiler that spans the surface to 500m joins the McLane instrument line.

- ▽ Energetic open ocean to low-wave freshwater lakes and reservoirs
- ▽ Data sampling to a user-defined bottom range
- ▽ Sea-Bird IMM, Sea-Bird CTD, Sea-Bird Optical Backscatter, Aanderaa Oxygen Optode
- ▽ Deployments up to 18 months supported by inductive communications and continuous movement that reduces biofouling

Meet McLane's newest instrument: Prowler, a wave-actuated profiler that spans the surface to 500m joins the McLane instrument line.

- Suitable for the energetic open ocean, to low-wave freshwater lakes and reservoirs
- Low-cost, lightweight alternative to distributed sensors
- Data sampling to a user-defined bottom range
- Sea-Bird IMM, Sea-Bird CTD, Sea-Bird Optical Backscatter, Aanderaa Optode
- Deployments up to 20 profiles per day for 12 months possible, supported by inductive communications and continuous movement that reduces biofouling
